DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group III, Species D in the reply filed on April 25, 2006 is acknowledged. Applicant's reply appears to indicate that claims 1, 3-5, 10-15, and 19-20 are readable on the elected species. However, claims 10-11 and 13-15 do not read on the species D. Accordingly, claims 2, 6-11, and 13-18 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 3-5, and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Steinel et al. (US 4,642,158).

Steinel discloses all the recited elements of the invention including a hand tool portion having a working end (e.g., at 7) and a forced air portion having a blower and an outlet (e.g., at 6).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 12 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Steinel.

Steinel discloses the invention substantially as claimed except for a fastener including a first curved wall defining an aperture and an extending portion coupled to the first curved wall. However, it would have been obvious to one having ordinary skill in the art at the time the invention was made to employ such a fastener on the device of Steinel since the examiner takes Official Notice on the use of a fastener including a first curved wall defining an aperture and an extending portion coupled to the first curved wall as old and well known in the art for the purpose of coupling two elements. Walker, Dial, and Moreschi show examples of such a fastener.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Walker, Dial, Moreschi, and Martinez are cited to show related devices.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen Choi whose telephone number is 571-272-4504. The examiner can normally be reached on Monday-Thursday 9:00-5:30.
